

APJ-1 Air Purge Jacket P/N 150066

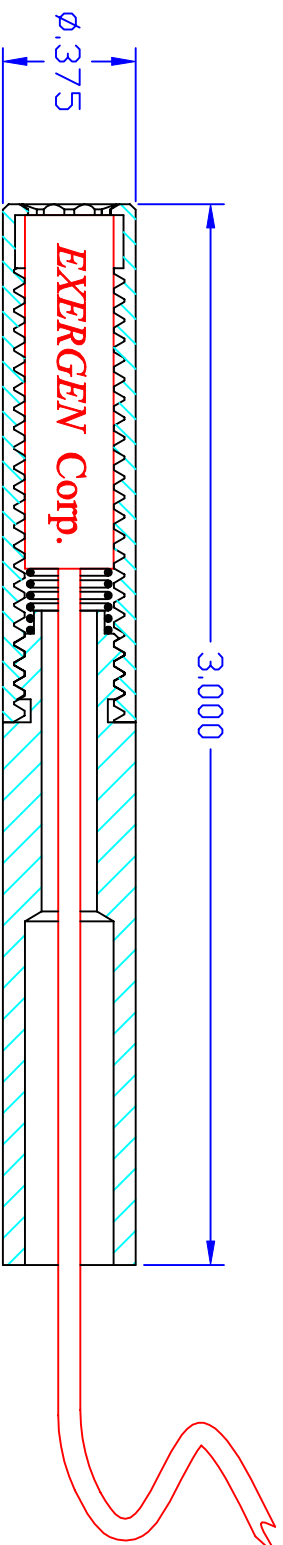

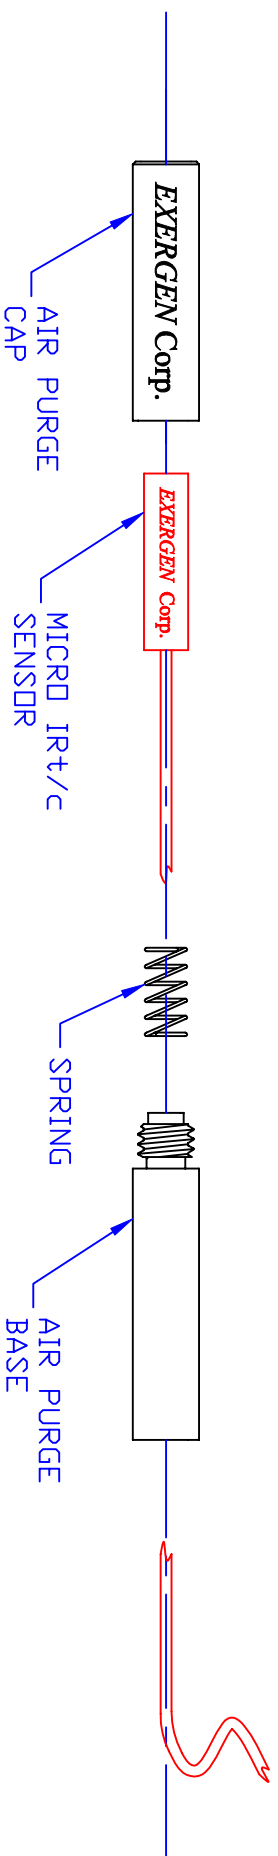

This convenient and inexpensive kit makes it possible to use the micro IRt/c™ with air for service in harsh environments. Measuring only 3/8" x 3" (9.5 x 76 mm) overall, the APJ-1 is physically small enough to fit into tight areas and closely monitor process temperatures from the optimum position - up close. This air purge kit ensures that the performance of a micro IRt/c does not degrade because of contamination by deposits of airborne chemicals or particles on the sensor. Efficient in design, the APJ-1 requires as little as 3.5 SCFH (1.7 L/min) of air to protect a micro IRt/c. In addition to keeping a micro IRt/c clean, the airflow through the air purge jacket can cool a micro IRt/c, allowing it to operate in environments of up to 347 °F (175 °C) with only 35 SCFH (17 L/min) at 5 psig (0.33 bar).

Features

- Small Size - 3/8" dia. x 3" long (9.5 x 76 mm)
- Aluminum housing
- Attaches to standard 3/8" tube fitting or 3/8" ID tubing
- Air purge and cooling

RECOMMENDED (not included) FITTINGS AND TUBINGS FOR APJ-1 ASSEMBLY

PARTS LIST

1. 1/4" NPT FEMALE COUPLING—MSC PART # 09723685
2. Polyurethane, vinyl, or copper tubing 1/4" (6mm)OD, 0.17" (4mm) ID.
3. Parker 444 MBZ-SS (or 444 MBZ-B) female run tee
4. Swagelock B-200-1-4BT (brass fitting) or SS-200-1-4BT (stainless fitting)
5. 3M 051135-36563—1/8" diameter adhesive lined semi rigid polyolefin MW heat shrink tubing (3/4" length)
