PRESS RELEASE

Exergen Industrial Division opens Exergen Industrial Sales Europe

Exergen Industrial Division has re-organized its distribution and representation within the European continent, via the creation of Exergen Industrial Sales Europe (EISE). This office will become responsible for all of our industrial sales and service activity in the region. Mr. Bart Van Liempd, formerly of Vic Sensorcontrols B.V., brings his 12 years experience with our product line to his new position as General Manager of this new office, in Veghel, Holland where he will oversee the sales and marketing of all of Europe (and parts of the Middle East).

The financial office will be located in Harpenden, England as EISE is a division of the QHi Group, headed by Ross Kennedy, President of QHi.

This new organization will be entirely focused only on Exergen / ancillary products, and we believe this new structure will provide significant benefits for our all customers, and in particularly OEM's.

We take the opportunity of thanking VIC Sensorcontrols B.V. for their efforts on our behalf during the period we have worked together. This new development has been possible with the co-operation of VIC enabling an amicable transition of business to EISE.

The transfer of all future business will take effect 1st August 2007, and Mr. Bart van Liempd is assured to implement the resources, and focus required for the continued growth and innovation of Exergen products within Europe for the future, as the Exergen Industrial product line is the only line that he will be focused on selling and supporting.

All former Vic Sensorcontrols customers will now work with EISE and EISE will be supporting all new business from August 1, 2007 on.
