

PRESS RELEASE

Exergen Corporation, Watertown, MA is pleased to announce its appointment of Vic Sensorcontrols in Helmond, The Netherlands as the exclusive European Agent. Vic Sensorcontrols has been an agent for Exergen for over 10 years covering Holland, Germany, Belgium, and France. They will now be the exclusive European agent and will cover most of the European Union (Norway, Finland, Denmark, Poland, Czech Republic, Slovakia, Spain, Portugal, Latvia, Estonia, Bulgaria, Rumania, Hungary, Turkey, Lithuania, Croatia, Montenegro, Bosnia, Herzegovina, Holland, Germany, Austria, Belgium, France, Greece, Luxembourg, and Switzerland). Ireland, Italy, Sweden, and the UK are the only exceptions.

Vic Sensorcontrols has a major presence in the graphics, packaging, agricultural, medical device manufacturing, food processing, and many other process control markets. They are a European operated company supplying the highest quality sensors and controllers, designed to meet the specific demands of modern industrial enterprises. VIC Sensorcontrols also provides expert advice in this highly specialized field. Sensors are an increasingly important element in appliances, machines, and production processes, with limitless application possibilities.

With distribution partners already in place in The Netherlands, Germany, Austria, Belgium, France, Sweden, and Greece, they are currently working on recruiting for the other countries in the European Union. With a staff who already speak the French, German, Dutch, and English languages, and with literature and manuals in those languages, they are prepared to work with all of the European Union. The Exergen website will also have links so that information is available in other European languages.

Exergen is excited and confident that the new tasks and challenges of Vic Sensorcontrols will make them leaders in the Infrared Temperature Measurement industry for all of Europe, and will capture more shares of the market place worldwide.

About Exergen

Exergen Corporation, located in Watertown, MA, designs and manufactures infrared temperature sensors designed for the performance of fast, accurate and non-invasive temperature measurements used in virtually all industries. Exergen's commitment to innovative temperature control technology continues to help customers meet or exceed their production requirements.
