WATERTOWN, Mass., Sept. 19, 2017 (GLOBE NEWSWIRE) -- For the second consecutive year, Exergen is proud to support Northeastern University Bouvé School of Nursing as a Mission Sponsor of the Nurse Innovation and Entrepreneurship program. The School's mission of elevating nurses' ability to become innovators and bring their ideas to life aligns with Exergen's. The company is joined by other sponsors including Johnson & Johnson, Mediatech and Massachusetts General Hospital. One of the events, a Nurse Practitioner Entrepreneurship Conference, designed for NPs who want to grow their understanding of the business side of healthcare, focuses on current, effective nurse-led business models.

Exergen Corporation's dedication to advancing nursing extends far beyond product development. In addition to manufacturing and marketing a professional and consumer model of the TemporalScanner thermometer, the company supports nurses in a wide variety of settings. Attending more than a dozen nurse affiliated conferences and providing online educational tools and certification programs are only some of the ways in which Exergen is hands-on in the field of nursing. The company provides thermometers at no charge for volunteer nurses who are caring for those in need and with serious diseases overseas. Dr. Marybeth Pompei, Senior Vice President and Chief Clinical Scientist of Exergen Corporation, is a mentor and advisor for nurses, including the Northeastern University Bouvé School of Nursing Nurse Innovation and Entrepreneurship program.

Not only are nurses on the frontline of patient care, they are the future of healthcare. Billions of temperatures are taken each year and, to deliver optimal patient care, healthcare professionals need a high quality, noninvasive thermometer. Exergen is committed to providing that with the TemporalScanner, which provides critical clinical benefits of accuracy, comfort and ease of use. This makes it a transformational product for healthcare professionals, particularly nurses who are the first to see a patient.

"Success in the nursing community begins with quality care followed by innovation. It is our mission to support nurses' work and help make their jobs easier and more effective," said Dr. Marybeth Pompei, Senior Vice President and Chief Clinical Scientist, Exergen Corporation. "Northeastern University is committed to changing the way the world perceives nurses and we are changing the way the world takes temperatures. We are excited to join forces again to help nurses fortify and advance skills."

Nurse, scientist and an entrepreneurial businessperson, Dr. Marybeth Pompei has been a featured keynote speaker for Northeastern University's Nurse Innovation and Entrepreneurship program. ABOUT EXERGEN CORPORATION

Exergen manufactures and markets two types of the TemporalScanner thermometer: a professional version for doctors' offices and hospitals, and a consumer model sold in major retailers nationwide. Nearly two billion temperatures are taken each year with the TemporalScanner. It is used in thousands of hospitals, clinics and pediatricians' offices across the country, as well as in millions of homes. It is the #1 preference of pediatricians, #1 preference of nurses in the US, and #1 selling retail thermometer. The Exergen TemporalScanner's performance is supported by more than 70 peer-reviewed published studies covering all ages from preterm infants to geriatrics and all care areas from hospitals to homes.
